

AI for Scrum Masters Overview

Description of the course value:

Learn how to engineer GenAI prompts, streamline workflows, and leverage AI for any team. In AI for Scrum Masters, you'll discover how to welcome AI to your agile team while showcasing your knowledge with an in-demand microcredential.

Learn how to integrate AI into everything you do as an agile team through hands-on experience with effective prompt engineering. Whether you're a scrum master, project manager, or team lead, this course will show you how to use AI to manage timelines, mitigate risks, and nurture the high performance of any agile team.

Course details:

- 4-hour live instructor-led class
- Students earn a Scrum Alliance microcredential badge and a 2-year membership*
- Great to bundle with other Scrum Alliance courses to build targeted skill sets for all agilists!

Pairs well with:

- Certified ScrumMaster®
- Certified Agile Facilitator™
- Scrum Essentials

Key benefits:

- Supercharge productivity and effectiveness when you welcome AI to the agile team
- Leverage AI to assist with managing timelines, predicting risks, and identifying metrics for team performance
- Stand out as a future-ready scrum master with AI skills
- Future-proof your career as a scrum master who knows how to leverage AI to benefit your team and your organization
- Train scrum masters and agile teams across your organization to integrate AI tools with ease
- Drive new levels of efficiency and effectiveness at your organization with AI tools for scrum teams

*Membership only included for nonmembers.
