

MICRO-CREDENTIAL

# SAFe® Agile Contracting for Government

Transform Government Contracts  
with Agile Best Practices

This specialized micro-credential equips government procurement professionals and contractors with essential knowledge and tools to create effective Agile contracts.

Learn to structure agreements that support SAFe® principles, deliver faster mission outcomes, and foster collaborative partnerships between government organizations and vendors.

## Why Attend?

### Streamline Procurement Cycles

Deliver compliant, high-value solutions at the speed of need to citizens and military personnel.

### Enhance Mission Outcomes

Improve project success rates through contracts that allow for iterative development, continuous feedback, and reprioritization of work.

### Foster Better Partnerships

Create win-win scenarios by aligning incentives with value delivery, enabling both government organizations and contractors to adapt to evolving requirements and technological shifts.

### Ensure Compliance & Accountability

Balance Agile flexibility with rigorous government oversight through effective performance metrics and quality assurance surveillance plans.

## What You Will Learn

### Agile Contract Fundamentals

Understand the differences between traditional and Agile contracting, with a focus on creating flexibility for unknown changing needs.

### Effective SOOs & Requirements

Create Statements of Objectives (SOOs) rather than prescriptive requirements to enable innovation and adaptability.

### Performance Measurement

Implement meaningful Agile metrics like flow efficiency, cycle time, and mission value delivered to evaluate contractor performance.

### Modular Contracting

Break large projects into smaller, manageable increments to improve efficiency, reduce risk, and increase flexibility.

### Proposal Evaluation

Focus on best value over lowest cost, using technical demonstrations and oral presentations to assess Agile capabilities.

## Course Format

### Half-Day Workshop

- In-person or virtual, with immersive discussions, exercises, and group activities
- Team-based activities that strengthen your ability to write or respond to an agile acquisition

### No Pre-Work Required

- One-and-done format designed to fit busy professionals' schedules

### Micro-credential Badge

- Validate your skills with a shareable digital credential

## Who Should Attend?

- **Procurement Officers & Contract Managers** responsible for drafting, negotiating, and managing contracts
- **Government Project & Program Managers** overseeing project execution
- **Government Officials & Policy Makers** looking to modernize procurement processes
- **Vendors & Contractors** providing services to government agencies
- **Vendor Business and Development** teams that respond to government solicitations
- **Legal Advisors & Compliance Officers** ensuring regulatory compliance
- **Product Owners** responsible for defining product requirements
